

2013-14 Indiana Olympic Development Program – John Carter, Director

Program Philosophy, Components and Activity Summary

Development is *the act or process of developing; unfolding; a gradual growth or advancement through progressive changes*. While ultimately the role of the Indiana Olympic Development Program is the identification and selection of players with the ability to progress to the next level of competition, the developmental process should be and will be at the forefront of the Indiana Olympic Development Program. The top players want to be challenged in competitive, positive, developmental environments against players of equal or better proficiency. If we refer to the above definition of “Development,” The Indiana Olympic Development Program goals are to provide for the unfolding of ideas about the game of soccer, to assist in developing the player’s confidence as well as ideas in order to solve problems the game presents, and to provide opportunities for the gradual growth and advancement of the player through challenging, creative, and positive training and playing environments.

The Indiana Olympic Development Program calendar runs from the end of August, when we begin the 11 month journey of identifying, evaluating, and training players, to July when we take 16 age groups (8 boys and 8 girls) to Region II camp to compete and train with the other 13 state organizations that make up Region II. Entering into the fourth full year of this calendar we continue to revise the goals of the program based on feedback from players, parents, and coaches. Based on the feedback received during and after the 2012-2013 year, the 2013-2014 Indiana Olympic Development Program player developmental goals were as follows:

- Understand, learn, and develop the technical qualities necessary to advance one’s game to the Regional and National level;
- Expand interpretation and understanding of the game from different perspectives (Systems and Positions);
- Learn and develop problem solving skills to be used before, during, and after matches;
- Learn how to confront adversity and respond responsibly, maturely, and thoughtfully;
- Learn how to effectively use different forms of communication with teammates and coaches;
- Learn how your role may change playing in different systems and in different positions;
- Become a soccer player, not a system or positional player;

To accomplish the overall goals of the Indiana Olympic Development Program as well as the player development goals, the Olympic Development Program training and developmental calendar (August – July) is broken down into three phases, plus Mini-Camp and Regional Camp. The three phases are Phase 1 (Fall), Phase 2 (Winter), and Phase 3 (Spring). Phase 1 and Phase 2 are considered State Pool Training which encompasses a larger pool of players. Players in the State Pool are trained and evaluated for a 6 month period (September – February) in preparation for our coaches to invite a selected group of players into Phase 3. Phase 3 is considered the State Team Pool. Every player invited to continue training as part of Phase 3 will either be named to the State Team or as an alternate. The players are trained in this tighter, more homogenous environment for a period of 4 months in preparation for Region II Camp. Each age group then attends a Region II camp or Showcase (depending on age group) in July based on the calendar set by Region II. Region II summer programming included a College Showcase/Tournament for the 1997, 1998, 1999, 2000, and 2001 boy/girls. The 2002 boys and girls had

a 4 day camp in July. Each age group, except for the 2002's, had a holdover camp (immediately following the Region II Showcase/Tournament) for selected players named to the Regional Pool in their respective age group.

The Olympic Development Program calendar also includes other special features and programs which are offered to enhance the player's developmental experience as well as accomplish the goals of the program:

Functional Training

As part of training we have begun to incorporate functional training during some of the outdoor scheduled sessions. Functional training is a wonderful component to help players expand on their ability to interpret and understand the game from different perspectives both from a system and position standpoint. Functional training will be broken down along traditional lines of play (Goalkeepers, Backs, Midfielders, and Forwards) but also non-traditionally such as pairing Goalkeepers/Central Backs/Targets, Playmakers (Central Midfielders), and Wide Defenders/Wide Attackers. In other words we will have the ability to introduce the players to a greater level of understanding through functional training by combining positions or areas of play on the pitch.

Special Invitational Training

Throughout the Olympic Development schedule we also incorporate opportunities to combine the top players from each age group for special training. One of the objectives of Indiana ODP is to prepare the players who have the ability to advance to the Regional and National levels. It is important that we provide the top level of each age group the opportunity to be challenged at a higher level than what the general pool offers. The top players want and need this environment and if we are going to adequately challenge the top players of Indiana, we must periodically assemble these players together in order to create such an environment.

ODP Friendlies/Scrimmages and participation in Tournaments

Positive remarks repetitively offered by participants concerning the Olympic Development Program is about the opportunity for the State Pool/Team to play against outside competition throughout the year. In 2013-14 Indiana ODP participated in the following events:

- Nov. 2-3, 2013: All Age Groups – Girls Veterans Invitational Tournament (Evansville, IN)
Entered 5 total teams
- Nov. 9-10, 2013: All Age Groups – Boys Veterans Invitational Tournament (Evansville, IN)
Entered 7 total teams
- Jan. 11-12, 2014: 1998/1999 Boys/Girls – Friendlies hosted by Illinois Youth Soccer
- March 1-2, 2014: 2000/2001 Boys/Girls – Friendlies hosted by Michigan Youth Soccer

- June 14, 2014: All Age Groups – Hosted Kentucky and Ohio South in annual Friendlies (Columbus, IN)

Open High School Evaluation Program

The Open High School Evaluation Program was established to satisfy the need to provide identification opportunities for players in high school to possibly join the State Pool in their age group. The Open High School Evaluation Program allows players who may have been part of the program in the past but dropped out, or who were not selected in the previous year to be re-identified or for those that have never been involved in the past but now have an interest in being identified, an avenue for selection into their respective age group State Pool. All high school players born in the three oldest age groups are extended an invitation to attend an open evaluation period for consideration to the State Pool. The open evaluation period occurs on the first two training dates of Phase 2, which begins following the completion of the Indiana High School soccer season. Participating players train in the State Pool session for their respective age group and are evaluated with and against the current State Pool players in each age group. If a player is invited to join the State Pool following the evaluation period, the cost (\$50.00) of the Open Invitation will be deducted from the State Pool Fee for Phase 2.

ODP 2003 Program: An Introduction to the Olympic Development Program

This program is designed to be an introduction for players born in the year 2003 into the ODP System and training environment that they will encounter in future years. "ODP 2003" was conducted in the North, Central, and South regions of the state in the late fall and early spring. There were two come together events scheduled this past year. The 2003's played against Kentucky and Illinois 2003's as part of the Indiana/Kentucky/Illinois friendlies in the first event. The second event was conducted during the last scheduled State Team training session in June. This event allowed the 2003's from around the state to come together. The "ODP 2003" program is purely a developmental program with the opportunity to train and play with the best players in one's age group as well as receive quality instruction from Nationally Licensed Coaches. Since this program is an introduction into the Olympic Development process, no State Team is formed and this group will not travel to Regional Camp. Players who participated in this program last year become the beginning State Pool in 2014-2015. Players born in 2003 will begin this process in August 2014 and attend Region II Developmental Camp in July, 2015. Cost per session to participate in an "ODP 2003" training session was \$20.00.
