

Player Development Program Camps

Play. Learn. Compete.

Indiana Soccer is excited to release the Player Development Program Winter Camp schedule for December, 2018 – January 2019. The Player Development Program Camps are open to all registered players in Indiana.

The mission of the Indiana Soccer Player Development Camps is to offer professional training for all players at any skill level designed in a fun but challenging age appropriate environment aimed at player development. The goals are to expose each player to different coaching styles, mixed with players from different areas, and to raise the overall ability level and general soccer awareness of each individual player. Players will be encouraged to have fun in the game, challenge themselves in positive training environments and to learn to love the game of soccer!

The Player Development Program will be conducted by a professional coaching staff consisting of nationally licensed coaches. The philosophy of “the game is the best teacher” will be implemented through each Player Development Program session. Each session will focus on the proper technique to perform each skill combined with the tactical aspects and physical aspects of the game while blending the proper mental approach to achieving the desired level. We believe that players improve from learning the proper skills, being challenged through the game, and through positive encouragement, hard work, and determination. Players will also have the opportunity to develop their technical skills in small group play and game scenarios. The coaching staff will insure the camps create a fun and challenging environment that also builds the confidence of each player to improve their skills and advance their individual game.
