

To: ODP Families

From: Director Sheely and ODP Staff

I wanted to inform everyone of two new exciting items Indiana ODP is bringing to our ODP players and families.

First, we have purchased some new [VEO](#) cameras for use with Indiana Soccer and Indiana ODP. These cameras will be used to record ODP training sessions and games. Once we record them we will upload them to a media platform. The player will be able to watch the session or game, and will be able to make a highlight video for colleges or other uses if he/she wants to.

Secondly we have purchased an evaluation software, [Team Genius](#), for our coaches to use when evaluating our players. Each coach will be trained to use the evaluation software and all players will be evaluated using the same criteria. Each player will be evaluated twice per year with more info coming...

Indiana Soccer and Indiana ODP recognize the financial burden recent times have placed on many of our families. These two new programs will be provided for all players at no additional costs. Team Genius and VEO will help enhance a player's development. As we move into the 2020/21 season more info will be available about both initiatives.

Thanks,

Todd Sheely- todd@soccerindiana.org
